

ASCLS CAREER RESOURCES

ASCLS is pleased to offer two exciting career recruitment tools, a CD and a Brochure entitled:

Careers in Clinical Laboratory Sciences “Create, Solve, Explore, Discover”

The brochure is a colorful, illustrated synopsis of our profession and presents testimonials from current practitioners. Some of these colleagues are working in traditional roles but others tell the story of how valuable CLS education is to other career paths. This brochure can be customized for your individual program. The back cover and inside “return” card can be imprinted with the logo and contact information for any educational program so it looks like it came straight from you.

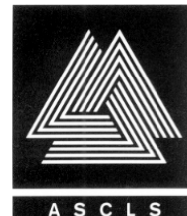

The publication is shipped flat so that a printer will be able to personalize the brochure easily with no unfolding charges. Order in quantities and save! All brochures will be shipped by UPS Ground.

The CD animates the brochure and goes a step further. It presents a “live” situation in a care setting to illustrate the role that the laboratory plays in providing a valuable service that contributes to the quality of health care in this nation.

QUANTITY PRICING	QUANTITY ORDERED	TOTAL
