

ASCLS is excited to introduce **ASCLS Voices Under 40**, recognizing our many talented and committed young professionals under 40 years old. The ASCLS Voices Spotlight honors ASCLS members who have shown exceptional commitment to ASCLS, the laboratory profession, and their community at large at a young age in their professional career. This month we spotlight one of the 2016 ASCLS Shining Voices who was selected from nominations across the country.

Please take a moment to get to know our ASCLS Voices Under 40 Spotlight, Lindsey Davenport-Landry from Iowa City, Iowa!

K. Lindsey Davenport-Landry is the Hematology and Transfusion Services Supervisor at the VA Medical Center in Iowa City, Iowa. She serves on multiple hospital committees and is always volunteering to help others.

Lindsey graduated from the ASCLS Leadership Academy in 2010, and has served in multiple leadership positions at the State and Regional levels, including two terms as Iowa State President. She has served on multiple committees including the ASCLS Membership Services committee and the Millennial Retention Task Force. She has given numerous presentations on subjects that range from lipid testing, professionalism, and statistics. She was recently accepted into the Alpha Mu Tau fraternity for her contributions to the society and to the profession.

When asked what her motivation for being active in ASCLS is, Lindsey responded: "ASCLS provides the voice and the face of the profession and I wanted to be a contributing factor like my mentors. I was shown the light by Mary Ann McLane and she gave me the ammunition to begin my journey towards providing the face of the profession and I continue to strive to do just that. ASCLS also provides a voice for our profession on legislative issues, licensure, and when a presence from the lab community is needed on other topics. I want to be able to contribute to improvements for all other laboratory professionals and ASCLS has provided a means to network and meet people who have the same interests which makes accomplishing a common goal more satisfying. The continuing education that ASCLS offers has also motivated me to stay involved. I like to be on top of current topics in laboratory science and being able to

learn from a diverse background has helped me become a primary resource to others. I find it very rewarding personally to be able to provide new insights to my peers and staff and aid in their professional development. Lastly, I remain involved due to the friends I have made throughout the years. I have become close to several members and they have become an extended part of my family. Without being involved with ASCLS, I would have never made these connections.”

Lindsey has a master’s degree in Clinical Laboratory Science and plans to continue on to achieve the DCLS. Thanks for all that you do Lindsey!
