

# Unit Coloring Sheet

The Lab Explorers are Clinical Laboratory Scientists. A clinical laboratory is where blood and other liquids that come from the body are tested. A scientist studies things in a laboratory.

Hi, my name is Unit. I am shaped like a blood donation bag. Blood can be donated (given for free), saved and stored in a bag like this. Sometimes people bleed too much when they have an accident and they need to be given some of the stored blood. Color my curly hair red.
