- Multiagency task force to harmonize systems reporting of laboratory test result codes
- FDA published the "Logical Observation Identifiers Names and Codes for In Vitro Diagnostic Test" to encourage instrument manufacturers to provide LOINC® codes for their tests
- IVD Industry Connectivity Consortium (IICC) provided a digital format to provide the codes to laboratories <http://ivdconnectivity.org/ivd/>
- Pilots for proof of concept

Division of Laboratory Systems Excellent Laboratories, Outstanding Health 10

Life Without Harmonization and Interoperability

Code Used	Display Name
496	Hemoglobin A1c
L33431	HbA1c
0070426	Hemoglobin A1c
001453	Hemoglobin (Hb) A1c, blood
005223	Hemoglobin A1c
HBA1C	Hemoglobin (Hb) A1c. Blood
83036	Hemoglobin A1c (HbA1c)
C145	Hemoglobin A1c
4548-1	Hemoglobin A1c

Division of Laboratory Systems Excellent Laboratories, Outstanding Health 9

- ### Benefits of Using SHIELD Approach
- Reduce the mapping burden for laboratories
 - Reduce the amount of time needed to interpret and import laboratory data into other systems
 - Improve data quality for surveillance activities, outbreaks and patient care
 - Reduce adverse events
 - Improving clinical decision support
 - Reduce financial burden on the healthcare ecosystem.
- Division of Laboratory Systems Excellent Laboratories, Outstanding Health 13

Clinical Laboratory Integration into Healthcare Collaborative (CLIHIC)

Clinical decision support tools

- Evaluation of partial thromboplastin time (PTT) Advisor mobile application accepted for publication in Journal of the American Medical Informatics Association**
 - Contribute to better clinical laboratory test ordering and diagnosis and serve as a learning tool for diagnostic evaluation of certain bleeding and coagulation disorders.
- Anticoagulation Manager mobile application**
 - Resource for clinicians to appropriately order laboratory testing and choose anticoagulant drugs and dosage for patients
 - Publication in the app store coming soon

PTT CDC

ANTICOAG MANAGER CDC

Diagnostic Safety and Improvement

- **Diagnostic Management Team (DMT) evaluation**
 - Conduct an evaluation that will compare DMT-based diagnostic decision making and traditional, clinician-based decision-making
- **Agency for Healthcare Research and Quality (AHRQ) Initiative**
 - Establish a cross-agency research agenda for diagnostic safety and improvement

Division of Laboratory Systems Excellent Laboratories, Outstanding Health 13

CDC Laboratory Training

- **In FY2017**
 - 34 publicly available eLearning courses
 - 84 in-person workshops
- Join the **Laboratory Training Group** in CDC TRAIN

<http://www.cdc.gov/labtraining>

Division of Laboratory Systems Excellent Laboratories, Outstanding Health 14

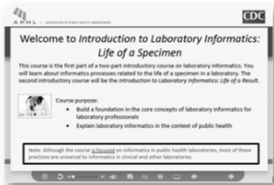

Ready? Set? Test! Online Course

- Course is available free on CDC TRAIN and offers free CE
- Knowledge check questions throughout the course to reinforce learning
- Templates, checklists, resources to save/download
- Scenarios – nursing home, hospital, doctor’s office
- www.train.org/cdctrain/course/1056331

Division of Laboratory Systems Excellent Laboratories, Outstanding Health 17

Laboratory Informatics Training

- Development of eLearning modules
- Trainings outline informatics capabilities, standards, and terminology that apply to both public health and clinical laboratories

- 3 Courses to be released in 2018:
 - Introduction to Laboratory Informatics: Life of a Specimen (July)
 - Introduction to Laboratory Informatics: Life of a Result (July)
 - Introduction to LIMS and Other Information Systems (Dec)

Workforce Assessment of Laboratory Communities (WALC)

New Initiative!

Objectives:

- 1) Identify the critical training and workforce development needs in the public health laboratory and clinical laboratory communities
- 2) Generate feedback on DLS resources, including *Laboratory Competency Guidelines* uptake and application
- 3) Collaborate with partners to prioritize and address needs in laboratory training and workforce development

17

Data for Action

- 1) Identify the critical training and workforce development needs in the public health laboratory and clinical laboratory communities (Years 1-2)
 - Literature review (Year 1)
 - Identify themes and gaps in data (Year 1)
 - Work with clinical partners to fill gaps in data (Year 2) (what priority questions have little or no recent data available?)
- 2) Generate feedback on DLS resources (Years 1-2)
- 3) Collaborate with partners to prioritize and address needs (Year 3)

18

Summary

- A focus of DLS is Reducing Diagnostic Errors
 - SHIELD is systems based informatics approach
 - Evaluation of Multidisciplinary Medical Management Teams
 - Enhancing laboratory workforce
- Our approach is a work in progress
